LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
③	④	③	Lowest Highest
			① ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

Global equities remained volatile and gained marginally in April, with US equities underperforming amid the ongoing tariff war between the US and China. Both the European Central Bank (ECB) and the Reserve Bank of India (RBI) cut repo rate by 25 basis points (bps). The Federal Reserve (the Fed) officials expected inflation to increase this year due to high tariffs but acknowledged uncertainty about the extent and duration of these effects, as noted in the Federal Open Market Committee meeting minutes. The Fed still anticipates a reduction in interest rates by around 50 bps this year. Annual inflation rates in the US and Europe slowed to 2.4% and 2.2% respectively, driven by a decline in energy prices. European equities outperformed global equities, driven by signs of a potential de-escalation in the US-China trade war. Conversely, Chinese equities, especially real estate stocks, lagged global markets due to the withholding of additional stimulus. Indian stocks performed well, bolstered by a weaker USD and strong earnings from banking stocks. Emerging markets (EM) outperformed developed markets (DM), with India and Brazil leading the outperformance while China gave negative returns. Turkish equities declined due to a decrease in consumer confidence and spending intentions, coupled with elevated interest rates. Conversely, Thailand experienced a significant increase in April, propelled by record-high export levels in March amidst subdued inflation.

IMPORTANT INFORMATION

Based on the Fund's portfolio returns as at 30 April 2025, the Volatility Factor (VF) for this Fund is 13.9 and is classified as "High" (Source: Lipper). "High" generally includes funds with VF that are higher than 11.98 but not more than 16.345. The VF means that there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision. The VF for the Fund may be higher or lower than the VC, depending on the market conditions. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.

Investors are advised to read and understand the contents of the Eastspring Investments Global Equity Fund ("Fund") Prospectus dated 25 November 2021, the Fund's First Supplementary Prospectus dated 15 July 2022, the Fund's Second Supplementary Prospectus dated 2 February 2024, the Fund's Third Supplementary Prospectus dated 17 March 2025 (collectively, "the Prospectuses") and the Fund's Product Highlights Sheet ("PHS") before investing. The Prospectuses and PHS are available at offices of Eastspring Investments Berhad or its authorised distributors and investors have the right to request for a copy of the Prospectuses and PHS.

This advertisement has not been reviewed by the Securities Commission Malaysia ("SC"). The Prospectuses have been registered with the SC who takes no responsibility for its contents. The registration of Prospectuses with the SC does not amount to nor indicate that the SC has recommended or endorsed the product. Units will only be issued upon receipt of the application form accompanying the Prospectuses. Past performance of the Fund is not an indication of the Fund's future performance. Unit prices and distribution payable, if any, may go down as well as up. Where a unit split/distribution is declared, investors are advised that following the issue of additional units/distribution, the Net Asset Value ("NAV") per unit will be reduced from pre-unit split NAV/cum-distribution NAV to post-unit split NAV/ex-distribution NAV. Where a unit split is declared, investors are advised that the value of their investment in Malaysian Ringgit will remain unchanged after the issue of the additional units.

Investments in the Fund are exposed to collective investment scheme ("CIS") risk, country risk, currency risk, income distribution risk, related party transaction risk, financial derivative instruments risk and fund management of CIS risk. Investors are advised to consider these risks and other general risks as elaborated in the Prospectuses as well as fees, charges and expenses involved before investing. Investors may also wish to seek advice from a professional adviser before making a commitment to invest in units of any of our funds.
